

TORQ VIEW

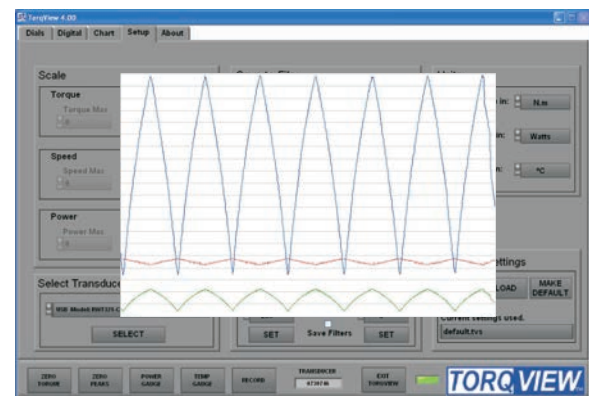

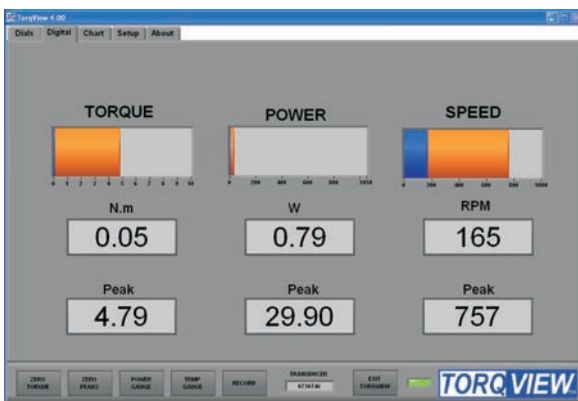

Advanced Torque Monitoring PC Interface Software

Advanced Torque Monitoring PC Interface Software

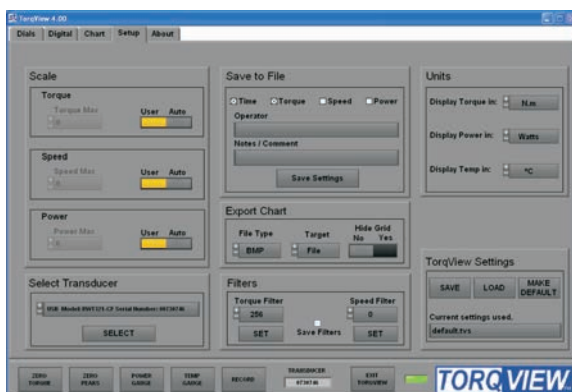

TORQ VIEW is an easy to use advanced torque monitoring software available to operate in conjunction with the RWT420 and RWT440 Series Transducers to provide a flexible display, real time plotting and data recording facility.

TORQ VIEW has been written using National Instruments LabVIEW, and as it is a self running executable file so LabVIEW is not required to run this software.

Hardware requirements (Recommended)

Sensor Technology recommends a PC running Windows XP, Vista or 7 with a minimum of 512 MB of RAM; a minimum screen resolution of 1024 x 768 pixels; a Pentium III or equivalent processor; and a minimum of 600MB free disk space

Benefits

- Simple installation using serial port or USB.
- Ease of operation (user friendly, a variety of user interface settings such as scales, units, etc.)
- 3 types of display: dials, digital bars and chart graph.
- Wide choice of displayed units (SI, FPS and MKS)
- Displays torque, RPM, power and temperature. Output a text file compatible with Matlab, Excel.
- LabView VIs available for users to design their own Interfaces
- DLLs available for users to write their own custom software process control applications.
- Data recording facility.
- User configurable settings
