

LOADVIEW

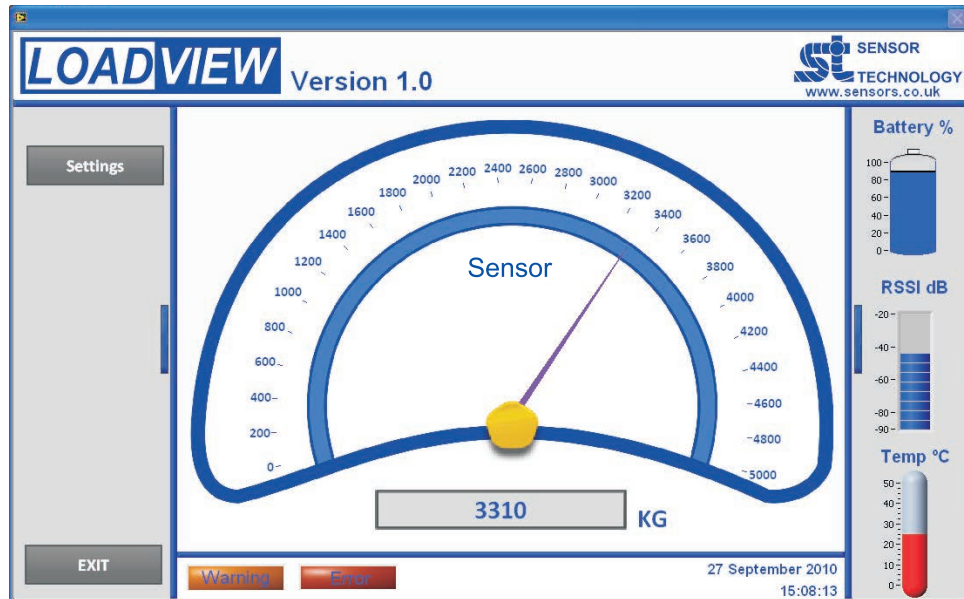

Advanced Load Monitoring PC Interface Software

Advanced Load Monitoring PC Interface Software

LOADVIEW is an easy to use load monitoring software available to operate in conjunction with the WLS-RI Receiver Interface or WLS-HR Handheld Readout to provide a flexible display, real time plotting and data recording facility.

LOADVIEW has been written using National Instruments LabVIEW, and as it is a self running executable file, LabVIEW is not required to run this software.

Hardware requirements (Recommended)

Sensor Technology recommends a PC running Windows 10/8/7 with a minimum of 1GB of RAM; a minimum screen resolution of 1024 x 768 pixels; a Pentium 4 or equivalent processor; and a minimum of 650 MB free disk space.

Benefits

- Simple installation using serial port or USB.
- Ease of operation (user friendly, a variety of user interface settings such as scales, units, etc.)
- Displays load, signal strength, battery and temperature.
- Output a text file compatible with Matlab, Excel.
- LabVIEW VIs available for users to design their own Interfaces.
- DLLs available for users to write their own custom software process control applications.
- Data recording facility.
- User configurable settings
- Multiple screen views
